Summary

Associate-2 (Gen AI Engineer) with 2+ years of experience building agentic, multi-agent systems for audit automation and enterprise workflows using LangGraph and RAG. Skilled in designing scalable, cloud-based AI solutions with multimodal data and LLM evaluation. Focused on building intelligent, secure, self-improving AI systems and driving real-world impact through production-grade AI applications.

Experience

PwC - PricewaterhouseCoopers

Feb. 2024 – Present

Associate 2 (Gen AI)

• ACTA - Agentic Controls Testing Assistant

- Designed and implemented ACTA as a multi-agent LangGraph-based system, where an orchestrator coordinates parallel agents using RAG and semantic indexing to analyze controls, process evidence, and automate audit testing workflows.
- Built and deployed on Azure using LangChain, Azure OpenAI, and Microsoft Graph connectors to retrieve enterprise data, while leveraging embeddings, OCR, and multimodal processing to interpret complex evidence and generate structured, human-reviewable audit narratives at scale and reduced manual audit effort by 60% .
- Implemented LLM-as-a-judge evaluation for confidence scoring to reduce hallucinations and improve accuracy by 40%, while optimizing latency using chunking, embedding optimization, and semantic indexing for faster, accurate retrieval and response generation.

• CLUTS - Custom GPT based solution

- Built CLUTS, a GPT-powered pipeline with multiple reasoning steps using prompt engineering and RAG to normalize controls into structured format, detect gaps, and standardize audit-ready outputs, and adapted it to client-specific requirements across 5+ projects within the practice.
- Deployed on Azure and developed with LangChain, Azure OpenAI, and RAG-based retrieval to generate test steps, sampling logic, and evidence requirements, enabling scalable control standardization and reducing manual audit effort.

Insignia Consultancy Solutions

May 2023 – Aug. 2023

Microservices Developer Intern

- Collaborated with development team to design and implement Java SpringBoot microservices for subscription management, including input validation and transaction rollback.
- Developed REST endpoints, creating JPA entities and optimizing MySQL queries for accuracy and performance.

Education

Graphic Era Hill University, Dehradun

Sep. 2020 – Jun. 2024

B.Tech. in Computer Science & Engineering (8.25/10)

Maria Assumpta Sr. Sec. Convent School, Kashipur

Mar. 2019 – Apr. 2020

Senior Secondary Education - XII (85%)

Skills

- **AI Systems & tools:** Generative AI, Agentic AI, RAG, LangChain, LLMs, MCP Servers, Multi-Agent system
- Languages & Frameworks:** Python, Java, Fast API, System Design, SpringBoot Microservices, REST APIs
- Cloud, DevOps & Databases:** Azure OpenAI, Docker, MLOps, Git, DevOps, ChromaDB, MongoDB
- Professional Skills:** Problem Solving, Adaptability, Client Management, Structured Communication, Active Listening

Projects

Roxy - Interview Voice Assistant (Llama, FastAPI, RAG, LangGraph, ChromaDB, Whisper, Coqui)

- Designed architecture for Roxy using LangGraph as a multimodal interview system with multiple orchestrated agents handling - content analysis, questioning, evaluation & feedback.
- Built and deployed on cloud using FastAPI, ChromaDB, Whisper STT and Coqui TTS, leveraging RAG, embeddings to process PDFs, audio, and video, enabling voice-driven interviews with real-time evaluation and retrieval-backed responses.
- Implemented self-improving pipeline that refines prompts, retrieval, and evaluation using feedback-driven workflow analysis.

Certifications & Publications

- Selected for **McKinsey Forward Program**, focused on problem solving, digital, and leadership skills.
- **AWS Certified Cloud Practitioner**
- **Published research** on breakout/reversal trading using candlestick-close and RSI divergence strategies. **IEEE Xplore**
- Awarded **PwC's Extra Miler Award & Quarterly LoS** for taking Agentic AI initiatives and project deliverables.
