Summary

Results-driven Software Engineer with 1+ years of experience developing and deploying microservices using Java, SpringBoot and RESTful APIs. Familiar with Docker multi-stage builds, AWS ECS deployments, and basic CI/CD automation using Jenkins. Hands-on exposure to MySQL and MongoDB, with experience building scalable cloud applications and working in agile team environments.

Experience

Associate 2

Feb. 2024 – Present

PwC - PricewaterhouseCoopers Intl. Ltd.

- Designed Docker multi-stage builds for microservices, reducing image size and improving performance; automated build pipelines with Jenkins to streamline CI/CD workflows and enhance deployment across distributed cloud environments.
- Deployed containerized applications on AWS ECS, leveraging auto-scaling and monitoring for reliability & efficiency.
- Developed and optimized Java-based microservices with RESTful APIs, integrating secure authentication, logging, and exception handling to improve system reliability, maintainability, and performance across distributed cloud environments.

Microservices Developer Intern

May 2023 – Aug. 2023

Insignia Consultancy Services

- Collaborated with a small team to design and implement Spring Boot microservices for subscription management, including input validation and transaction rollback and deployment on AWS Cloud.
- Developed REST endpoints, creating JPA entities and optimizing MySQL queries for accuracy and performance.
- Set up Maven-based build processes and Docker containers for local development and testing, improving environment consistency, and actively participated in daily Scrum stand-ups and backlog grooming sessions.

Education

Graphic Era Hill University, Dehradun

Sep. 2020 – Jun. 2024

B.Tech. in Computer Science & Engineering (8.25/10)

Maria Assumpta Sr. Sec. Convent School, Kashipur

Mar. 2019 – Apr. 2020

Senior Secondary Education - XII (85%)

Technical Skills

Languages: Python, YAML, Java, SQL, JavaScript, HTML/CSS

Frameworks: Spring Boot, Hibernate, Flask

DevOps & CI/CD: Git, Jenkins, Docker, AWS ECS/Lambda, Kubernetes, Maven

Databases: MySQL, MongoDB

Projects

Research and Implement Mean Reversion on Popular Stocks (Python, Trading Strategies)

Jan. 2024

- Developed mean-reversion trading strategy in Python using linear regression to identify reversions in volatile markets.
- Back-tested the strategy on historical Indian stock data, achieving consistent gains and integrating stop-loss plus position-sizing risk controls for improved profitability.

Cloud-Based Student Information Chatbot System (Python, AWS, Slack)

Oct. 2023

- Built a Slack chatbot in Python and AWS Lambda for CRUD on a student database via natural-language queries.
- Designed and deployed MongoDB tables and API Gateway endpoints, enabling scalable, serverless data management with sub-second query response times.

Publications

Quantitative Insights into Breakout and Reversal Trading Strategies, *IEEE*

Mar. 2024

Published a research paper presenting a breakout/reversal trading strategy combining candlestick-close and RSI divergences, validated through back-testing with risk management controls that achieved a trade win rate of more than 90%. IEEE Xplore

Achievements & Extra-Curricular

- AWS CCP certified and currently preparing for AWS Solutions Architect certification for cloud architecture expertise.
- Awarded PwC's Extra Miler Award for delivering high-quality work and consistently exceeding project deliverables.
- Mentored 10+ students in Crypto and Forex trading, teaching technical analysis and risk management strategies.
