Dear Hiring Manager,

I am writing to express my interest in the Professional Software Engineer role at Volvo Group Digital & IT in Gothenburg. With strong experience in building scalable microservices, REST APIs, and cloud-native applications using .NET and modern engineering practices, I am excited about the opportunity to contribute to Volvo's digital transformation journey.

In my recent work, I have designed and developed distributed systems leveraging .NET, SQL, and microservices architecture, with a strong focus on clean code, SOLID principles, and testability. I am comfortable working in Agile environments and have hands-on experience with CI/CD pipelines, system design, and end-to-end solution delivery. Additionally, I bring exposure to modern frontend technologies and a continuous improvement mindset aligned with DevSecOps practices.

I am also a McKinsey Forward Program learner, which has strengthened my problem-solving, structured thinking, and professional communication skills—enabling me to deliver impactful and business-aligned technical solutions.

I want to highlight that I am fully familiar with the visa and relocation process for Sweden and am prepared to manage it independently, ensuring a smooth transition without additional overhead.

Volvo's vision of shaping sustainable transport through technology strongly resonates with me, and I would welcome the opportunity to contribute to your global, high-performing team.

Thank you for your time and consideration. I look forward to the opportunity to discuss further.

Sincerely,

Pushkar Singh
