Experienced software engineer with a strong background in automation, backend development, and data management. Proficient in Python, Java, and SQL, I have successfully implemented ITGC control testing and developed microservices solutions. I am dedicated to delivering high-quality solutions that enhance team productivity and contribute to overall project success.

Experience

PwC PricewaterhouseCoopers Intl. Ltd.

Feb. 2024– Present

Associate – 1

Bengaluru

- Automated data extraction from PDFs using Python (PyPDF2, pandas) and streamlined data entry into Excel, reducing manual effort by 60% and improving accuracy.
- Created automated workflows to extract, process, and generate Excel reports with visual summaries, enhancing decision making through real-time data insights.

Insignia Consultancy Services

May 2023 – August 2023

Microservices Developer Intern

Remote

- Designed and developed a robust subscription management system using Java, Spring Boot, and MySQL, supporting operations like create, update, delete, and query for subscription plans.
- Built dynamic SQL queries for flexible updates of subscription plan fields based on user input, incorporating input validation and error handling to ensure data integrity and smooth functionality.

Education

Graphic Era Hill University

Dehradun

B.Tech. in Computer Science and Engineering (8.25/10)

September 2020 – June 2024

Maria Assumpta Sr. Sec. Convent School

Kashipur

Senior Secondary Education (85%)

2020

D.A.V. Public School

Kashipur

Secondary Education (87%)

2018

Projects

Research and Implement Mean Reversion on popular Stocks

- Developed a mean-reversion trading strategy using linear regression and normal distribution to identify price reversion in volatile markets.
- Back-tested strategy on Indian stocks using historical data, achieving consistent gains, and validating its effectiveness in various market conditions.
- Implemented risk management techniques, including stop-loss and position sizing, to minimize losses and enhance long-term profitability.

Cloud Based Student Information Chatbot System

- Developed a Slack chatbot enabling CRUD operations on student databases via natural language queries.
- Used Python and AWS Lambda to automate database interactions through seamless conversational interfaces.
- Enabled efficient student data management with user-friendly query handling and automated database operations.

Publications

IEEE: Quantitative Insights into Breakout and Reversal Trading Strategies

[IEEE Xplore Link]

- Designed a trading strategy combining candlestick closing and RSI divergences, providing actionable insights for identifying breakout stocks.
- Developed strategy and published a research paper on breakout and reversal trading strategies, leveraging historical stock data to back-test and validate the effectiveness of quantitative trading techniques along with risk management.

Technical Skills

Languages: Python, Java, HTML, CSS, JavaScript

DevOps and Automation: Git, Selenium, AWS, Docker

Tools/Technologies: Spring Boot, MySQL, MongoDB, GitHub, Linux

Achievements & Extra - Curriculars

- Extra Miler Award:** Awarded for outstanding performance and delivering high quality performance, and demonstrating strong commitment to team success.
- Crypto and Forex Trading:** Mentored 10+ students on technical analysis and risk management, engaged in personal forex and cryptocurrency trading applying strategies to manage a diversified portfolio, gaining hands-on experience in market trends.
- NDA 2 2020:** Cleared NDA written examination among 0.85 million candidates and reached final stage of SSB. Instructed 10+ students for NDA examination and SSB.
