Summary

Associate - Software Developer with 2+ years of experience building scalable microservices and AI-driven systems. Skilled in Java, Spring Boot, and cloud-native development, with hands-on experience in Generative AI, RAG, and agentic architectures. Currently at PwC, delivering enterprise solutions integrating LLMs, automation, and distributed systems to improve audit workflows, incident management, and data-driven decision making.

Experience

Associate 2 (Software Development)

Feb. 2024 – Present

PwC - PricewaterhouseCoopers Intl. Ltd.

- Built an Agentic GenAI system for audit control testing using RAG, semantic indexing, and Microsoft connectors, generating evidence-traceable & confidence-scored assessments, and testing blueprints with human-in-loop review.
- Architected and implemented scalable Spring Boot microservices to handle authentication and data processing workloads, enabling secure RESTful integrations across multiple internal teams. Designed modular APIs, optimized performance, and implemented monitoring mechanisms to support daily requests while ensuring reliability, and secure access control.
- Built CLUTS, a GPT-powered control analysis engine that standardizes RCSA/SOX controls into 5W1H format, identifies design gaps, aligns risk logic, and generates audit-ready test scripts and PBC evidence lists.
- Containerized SpringBoot microservices with Docker, deployed on AWS ECS, automated via Jenkins CI/CD.

Microservices Developer Intern

May 2023 – Aug. 2023

Insignia Consultancy Services

- Collaborated with a small team to design and implement Spring Boot microservices for subscription management, including input validation and transaction rollback.
- Developed REST endpoints, creating JPA entities and optimizing MySQL queries for accuracy and performance.

Education

Graphic Era Hill University, Dehradun

Sep. 2020 – Jun. 2024

B.Tech. in Computer Science & Engineering (8.25/10)

Maria Assumpta Sr. Sec. Convent School, Kashipur

Mar. 2019 – Apr. 2020

Senior Secondary Education - XII (85%)

Skills

- **Languages & Frameworks:** Java, Python, Spring Boot, System Design, Microservice Architecture, REST APIs
- **AI Systems & tools:** Generative AI, Agentic AI, RAG, LangChain, Vector DB, MCP Servers, Multi-Agent system
- **Cloud, DevOps & Databases:** AWS, Docker, Jenkins, Git, DevOps, MySQL, MongoDB
- **Professional Skills:** Problem Solving, Adaptability, Client Management, Structured Communication, Active Listening

Projects

Multimodal Voice RAG Assistant (LLM, RAG, Python, TTS, STT, LangChain, Chroma)

- Built multimodal voice bot using RAG, LangChain, and LLMs to query documents, audio, video.
- Implemented Python-based pipeline extracting knowledge from PDFs, text, audio, and YouTube using transcription, vector databases, and LangChain retrieval, enabling voice-based contextual Q&A with LLM-generated responses.

LogBit - Intelligent Incident Monitoring Platform (Java, Spring Boot, OpenSearch, PostgreSQL)

- Built LogBit using Spring Boot to monitor real-time logs and detect incidents using Risk & Impact matrix.
- Automated incident triage by analyzing logs and generating JIRA tickets with priority, impact, and assignments.

Publications

Quantitative Insights into Breakout and Reversal Trading Strategies, *IEEE*

Mar. 2024

Published a research paper presenting a breakout/reversal trading strategy combining candlestick-close and RSI divergences, validated through back-testing with risk management controls. IEEE Xplore

Achievements & Extra-Curricular

- AWS CCP certified and currently preparing for AWS Solutions Architect certification for cloud architecture expertise.
- Awarded PwC's Extra Miler Award for delivering high-quality work and consistently exceeding project deliverables.
